## PROFILE

**Full-Stack Developer** with expertise in JavaScript (React, Node), TypeScript, PHP and WordPress. Proven ability to deliver high-quality, performant web applications across the entire development stack, including building and customizing functionalities on the industry-leading WordPress platform. Experienced in Agile methodologies and collaborating with cross-functional teams. Passionate about leveraging technology, including open-source solutions like WordPress, to drive innovation and exceptional user experiences.

## EMPLOYMENT HISTORY

### Web developer at Osolo Consultant Group

May 2018 — Present

During my time at Osolo Consultant Group, I have been responsible for developing and maintaining web applications, ensuring high-quality and user-friendly interfaces for our clients.

- Implemented responsive designs using HTML, CSS, and JavaScript to create visually appealing and accessible websites.
- Collaborated with cross-functional teams to gather requirements and design solutions, ensuring seamless integration and optimal functionality of web applications.
- Utilized React to develop interactive and dynamic user interfaces, enhancing user experiences.

## EDUCATION

### Advanced Diploma in Front-End Development, KYH

August 2016 — May 2018

### University preparatory exam, Cybergymnasiet

August 2012 — June 2015

Information and Media Technology - Programming, Photoshop, 3D modeling, Game Development, Web Development.

## INTERNSHIPS & PROJECTS

### Wordpress Developer at Lightweb

November 2017 — April 2018

- Created custom WordPress plugins that extended the core features of WordPress, increasing site functionality.
- Optimized WordPress sites for performance, reducing page load times.
- Developed and implemented custom themes that enhanced the user experience, resulting in better user engagement.

### "Robotkodarn" - React Developer at Vinnovera

April 2017 — June 2017

- Developed a single-page web application using React and Redux. In which Arduino code was compiled on the fly through the web browser and sent to a USB device.
